

New SecurityVision 2020

Ultimate Polycarbonate Shutters

Strong as Steel Clear as Glass

New Security Limited supplies the ultimate in high security transparent roller shutters. They are tough, durable &

transparent, designed to provide high security to shops and restaurants and maintain 90% transparency. Think of a glass wall that rolls up into the ceiling at the touch of a button and your getting the right idea.

Construction

Our panels are made from clear transparent polycarbonate. These are held together and guided by extruded aluminium joints and smooth run guides, which can be powder coated to enhance and match your colour scheme. The bottom of the curtain is finished with a double walled strong rail complete with rubber seal. We can produce New SecurityVision 2020 motorised either single or 3 phase electric with switch, key or remote/fob control. New SecurityVision

2020 is versatile and can be supplied with 100% self support system requiring minimal lateral bracing, or in parts ideal for building into ceilings and facades.
