

New SecurityShield77

Insulation At Heart

At a glance;

The New SecurityShield77 provides effective heat and sound insulation at the heart of its security application. This product is specifically designed for large commercial, industrial and retail properties to keep the heat in, for example if it was constantly opening and shutting for cars or fork lift trucks. When doing this it also effectively acts as a blackout curtain and provides a good level noise insulation.

Advantages and spec include;

- ▶ CFC-free foam filled rolled aluminium profile
- ▶ Medium security for commercial, industrial and retail premises

- ▶ Spans widths up to 5400mm with effective heat and sound insulation
- ▶ Can be mixed with New Security Vision800 when partial vision is required
- ▶ The curtain material is available in up to 12 stock colours

Choose me if;

- ▶ You're looking for medium security
- ▶ You need your security with the added benefit of heat and sound insulation
- ▶ The overall width is not greater than 5400mm
- ▶ Ideal for retail and commercial premises
